SystemsApproach strategies

Do I know my legal responsibilities under the law?

Do I know my OH&S risks and priorities?

Do I know what to do to create and maintain a healthy and safe place of work?

Do I know how to enable workers to work safely?

Do I know what to measure?

Do I know how to enable workers to react to a change or an emergency?

Do I know what could go wrong and am I prepared to react effectively?

Do I know how to learn and improve when things go wrong?

Can I prove that I have done everything reasonable in the circumstance to avoid OH&S problems?

YES / NO

LOW / HIGH

Objective — *To establish as safe and healthy a workplace as possible*

Objective — *To establish proactive safety activities that control known hazards and protect workers from harm*

Objective — *To create a level of personal situational awareness that enables workers to identify, assess and manage personal risk*

GOAL — *To have workers performing work at an acceptable level of risk and in a manner that aligns with the organization's expectations*

Objective — *To create a level of personal situational awareness that enables workers to deal with change and emergency situations*

Objective — *To establish and maintain reactive safety activities that mitigate loss of control and prevent additional loss or harm*

Objective — *To establish and maintain an ability to conduct thorough investigation when control is lost resulting in actual or potential harm*
